

Koh Ding Yuan

Enterprise Software Delivery | Solution Architecture | Technical Leadership
Singapore | kdingyuan@gmail.com | <https://www.linkedin.com/in/kohdy> | +65 8218 2117

Profile

Technical professional with 3+ years of experience delivering **enterprise software solutions**, **solution architecture**, and **technical leadership**. Proven track record leading projects across the **full software delivery lifecycle**, partnering with business stakeholders to deliver scalable solutions within **security-sensitive enterprise environments**. Strong software engineering foundation with expertise in **system design**, **architecture**, and **cross-functional technical delivery**.

Professional Experience

Associate Consultant — Capgemini Singapore Pte. Ltd. <i>Promoted from Senior Software Engineer since Jun 2026</i>	Apr 2025 — Present
- Led end-to-end solution architecture and technical delivery across multiple enterprise initiatives, owning the full software lifecycle from requirements analysis and solution design through implementation, deployment, and production support within security-sensitive, air-gapped enterprise environments. Architected and delivered enterprise solutions integrating ETL pipelines, backend services, frontend applications, workflow automation, and LLM-powered capabilities, while partnering with business stakeholders to balance maintainability, security, scalability, and delivery objectives. - Provided technical leadership by guiding architectural decisions, defining implementation strategies, managing technical risks, coordinating cross-functional engineering, QA, and business teams, and mentoring graduate software engineers on enterprise development practices, code quality, and industry-standard engineering principles. - Led the transformation of an LLM-assisted document processing platform from prototype into a modular, production-ready system, while modernizing existing solutions through technical debt reduction, improving maintainability, scalability, and operational reliability. - Designed and implemented engineering automation solutions using Java (Jira API) and Python, reducing manual effort by 90%+ while improving operational efficiency and delivery productivity. - Conducted technical interviews for engineering candidates across the Singapore and Malaysia delivery teams. - Achieved Tricentis Tosca Consultant Certification.	

Early Career Experience

Project Management Intern — ASM International N.V.	Aug 2023 — Apr 2024
- Supported enterprise transformation initiatives through project coordination, stakeholder communication, documentation, and delivery tracking. - Led implementation and organizational rollout of Panaya, improving SAP testing governance and replacing manual Excel-based workflows. - Coordinated System Integration Testing (SIT), User Acceptance Testing (UAT), and Go-Live activities for SAP Variant Configurator Phase 2.	
Software Development Intern — KEYfields Pte. Ltd.	Apr 2018 — Aug 2018
- Developed enterprise backend solutions using C#, ASP.NET, SQL Server, and REST APIs. - Built a route optimization engine using Google Maps API, improving planning efficiency by 70%+. - Contributed to the National Trade Platform (NTP) through API development and enterprise system integration.	

Additional Professional Experience

Research Assistant — Singapore Institute of Technology	Oct 2021 — Jan 2023
Conducted quantitative research, developed structured data collection processes, and contributed analytical findings supporting an SIT ALIGN-funded research initiative.	
Store In-Charge (National Service) — Republic of Singapore Air Force	Dec 2019 — Aug 2021
Coordinated procurement, budget planning, contractor engagement, and infrastructure improvement initiatives, developing standardized tracking processes and analytical reporting that improved operational planning and project execution.	

Education

Bachelor of Science (Honors) in Computing Science Singapore Institute of Technology (Joint programme with University of Glasgow)	2021 — 2024
Diploma in Information Technology Singapore Polytechnic	2016 — 2019

Core Competencies

Leadership & Delivery	Solution Architecture, Requirements Analysis, Stakeholder Management, Delivery Planning, Risk Management, Agile Delivery, SDLC, Cross-functional Collaboration
Technology & Engineering	Java, Python, C#, C, JavaScript, ASP.NET, Flask, Django, Spring Boot, React, REST APIs, AWS, Azure, GCP
Data, AI & Automation	SQL Server (T-SQL), MySQL, SQLite, MongoDB, ETL Pipelines, LLM Integration, Workflow Automation, Data Processing
Languages	English (Native), Mandarin Chinese (Native)
